

SEEING IS BELIEVING!

The Shawn Williams Story

Before

After

Jeannie Williams of Orland, California wanted to share their story with you. They have a 5 year old son named **Shawn** that they adopted 4 years ago. He has cerebral palsy, respiratory problems and allergies.

During the 2 weeks prior to their Rainbow demo, Shawn was receiving nebulizer treatments every 10 minutes, plus taking other medications to control his symptoms. **Ron Messmer** from the Chico, California Rainbow office had been trying to schedule a demo with the Williams family for almost a year. They felt guilty putting Ron off any more so they finally agreed to let him come over. "We're so happy we set that appointment, and that Ron didn't give up on us!" Jeannie said. "When he did the demo in what we thought was a clean house, the Rainbow sold itself!"

After having the Rainbow in their house for just a few weeks, Shawn hasn't coughed at all. The doctor that they take Shawn to, told them that his nose and ears are the clearest that he has ever seen since treating him. Shawn has gone from nebulizer treatments every 10 minutes to **ZERO TREATMENTS** and is **off his allergy medications!**

"Shawn is full of life now." Jeannie said "To see Shawn down was so heart breaking. Now we know we have made a wise choice not only for Shawn, but for the whole family. We just wanted to get to word out there."

"Thank you Rainbow for changing Shawn's life and ours!!"
